

# Digital Wheel of Fortune – User Manual

This system allows you to run a professional digital prize wheel for events, shops, exhibitions and promotions. No technical knowledge is required for daily operation.

## 1. System Access

Your wheel is accessed through your personal web address:

<https://madeforarcade.com/games/prizewheel3/{INVOICE NUMBER}/>

Replace {INVOICE NUMBER} with your invoice number.

## Password

The password is your invoice total amount written in cents, without punctuation.

Example: If your invoice total is €123.45 → password = 12345

## 2. The Three Main Pages

- **index.php – The Wheel Screen**  
This is the public display. Show this on a large screen, TV, or monitor. Visitors see the spinning wheel, lights, animation, and the final prize result.
- **start.php – The Start Button**  
This page contains a large start button. Staff use this page on a phone, tablet, or laptop to trigger a spin remotely. The wheel screen reacts instantly.
- **settings.php – The Settings Panel**  
This page is password protected. It is used to configure prizes, appearance, win chances, and other visual options.

## 3. Daily Operation

- 1 Open index.php on the screen facing the audience.
- 2 Open start.php on a staff device.
- 3 Press the Start button when a player participates.
- 4 The wheel spins and stops automatically on the winning segment.

## 4. Settings Explained

- **Title** – Text shown under the wheel. Use for campaign names or branding.
- **Background Image** – Upload a background picture to match your event theme or brand colors.
- **Background Overlay** – Controls brightness/darkness over the background image for better readability.
- **Show Outer Bulbs** – Turns the animated perimeter lights on or off.
- **Bulb Color** – Select the color of the outer lights.
- **Move & Zoom During Spin** – Adds dynamic motion to make the spin more dramatic.
- **Prize Wheel Font** – Choose the text style used on wheel segments.

- **Font Size** – Adjust text size on the wheel.
- **Prize Name** – Text shown for each segment.
- **Win Chance (%)** – Determines probability. Total of all segments must equal 100%.
- **Segment Color** – Background color of each prize segment.
- **Loss Option** – Marks a segment as a non-winning result.

## 5. Tips for Best Results

- Use a large screen for maximum impact.
- Keep prizes short and easy to read.
- Balance win chances based on your promotion goals.
- Use brand colors for a professional appearance.

This system is designed to attract attention, engage visitors, and create memorable experiences while remaining easy to control. Reliable, fast, and built for public use.
